- Session 5: Climate change Gender nexus, in Financial Inclusion
1. Session Background
 2. Sub-themes overview
 3. Small group workshops
 4. Group presentation
 5. Q & A
 6. Wrap-up
 7. Mastercard Fund Information session

Climate change, Gender & FI

Climate change affects women disproportionately, exacerbating pre-existing gender inequalities.

During climate change crisis, women risk being exposed to various shocks.

Financial services (savings, credit, remittances, payment, and insurance) can help women to adapt and build resilient during climate change crisis if well designed and targeted.
